

[Document Name] ABSTRACT

[Abstract]

[Problem]

Provision of a hair shampoo composition having good foaming properties and providing foams with good lubrication upon shampooing, having smooth feel and imparting gloss, manageability and a pleasant feel such as resilience and strength to the hair upon rinsing, and protecting the hair from physical or chemical stimulation to make it resistant to damage.

[Means for Solution]

A hair shampoo composition containing (A) an amphoteric amide lipid, and (B), from 5 to 30 wt.% of sulfate surfactants which are each represented by the formula: $R-O-(C_2H_4O)_a-SO_3M$ (wherein, R represents a C_{8-18} alkyl or alkenyl group, a stands for 0 or a positive integer, and M represents an alkali metal, alkaline earth metal, or the like); are made of from 30 to 45 wt.% of a sulfate exhibiting $a=0$, from 18 to 27 wt.% of another sulfate exhibiting $a=1$, from 10 to 20 wt.% of a further sulfate exhibiting $a=2$, and the balance of further sulfates exhibiting $a=3$ or greater; and contain the sulfates exhibiting $a=0$ to 2 in an amount of 70 wt.% or greater based on the total sulfates.
